- A. Setbacks, regardless of applicable height, shall be measured from the property line (or upward projection thereof) to the nearest portion of a structure, including overhangs, eaves, private decks, stairways, steps, and mechanical equipment. The setback distance is measured horizontally in a straight-line, irrespective of intervening structures or site features.
- B. Except where otherwise specified, setback requirements are not cumulative (i.e. buffer distances and other setbacks provided by this Chapter, are inclusive of, not in addition to, the standard setbacks for the district). Where a district requires an increased setback above a specified height, only that portion of the structure above the specified height is subject to the increased setback.
- C. In the MS1, MS2, WF1, and WF2 districts, street level arcades, awnings, and other pedestrian amenities may encroach into the setback by a distance of no more than ten (10) feet, provided such projection does not obstruct a sidewalk or other pedestrian way and that a minimum of eight (8) feet of height clearance is maintained.
- D. Any yard abutting a public ~~right-of-way street or the oceanfront~~ is subject to the front yard setbacks specified by Table 5.3.420A (see table "notes" for special WF1 and WF2 setbacks). **However, if a lot has multiple front yards, front setbacks shall only be applicable to the yard abutting the public street in which the lot is addressed.**

If any provision, clause, sentence, or paragraph of this ordinance or the application thereof to any person or circumstances shall be held invalid, that invalidity shall not affect the other provisions of this ordinance, which can be given effect without the invalid provision or application, and any such provisions are declared to be severable. All ordinances or parts thereof inconsistent with this ordinance are repealed to the extent of such inconsistency.

EFFECTIVE DATE. This Ordinance shall become effective immediately upon adoption at second reading.
